

# PCI WEB APPLICATION SECURITY ASSESSMENT BY NETWORK TEST LABS INC.

PCI Requirement – 6.6 Public-facing web applications, address new threats and vulnerabilities on an ongoing basis and ensure these applications are protected against known attacks by either of two methods.

NTL provides a detailed Web Application Penetration Testing service. This is meant to pinpoint exploitable application weaknesses, allow developing resources to focus on addressing critical exposures. NTL security engineers assess your web applications to flaws cited by the Open Web Application Project (OWASP), such as:

PCI Requirement	OWASP Top Ten	Testing Requirement
6.5.1	A2-2010	Cross Site Scripting (XSS)
6.5.2	A1-2010	Injection (SQL, LDAP, and Xpath flaws)
6.5.3	A3-2007	Malicious File Execution
6.5.4	A4-2010	Insecure direct object references
6.5.5	A5-2010	Cross-site request forgery (CSRF)
6.5.6	A6-2007	Information leakage and improper error handling
6.5.7	A3-1020	Broken authentication and session management
6.5.8	A9-2010	Insecure cryptographic storage
6.5.9	A10-2010	Insecure communications/transport layer protection
6.5.10	A7-2007	Failure to restrict URL access

These prices are only valid for North American customers and are subject to change without notice.

Level	PCI Penetration Testing Service	Pricing
1	Small Business (1 URL with 20 pages)	\$ 1,500 CAD
2	Medium Sized Business (1 URL with 20 - 50 pages each)	\$ 3,250 CAD
3	Large Sized Business (1 URL with 50 - 100 pages each)	\$ 5,850 CAD

Network Test Labs in partnership with SAINT is certified (#4268-01-03) by the PCI Security Standards Council as an Approved Scanning Vendor (ASV). Network Test Labs is able to help merchants manage data security risks, evaluate the security of their systems that store payment account data and assist them in achieving compliance with the PCI data security standard (DSS).

NTL customers include large gaming operators, government agencies, and financial institutions.
